EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Richard A. Nebb on 06/22/05. The application has been amended as follows:

In the claims:

Claim 1. (Currently Amended) An image viewing system, comprising:
a lenticular sheet, and
a neutralizing sheet having a pliable portion, said neutralizing sheet being movable between a first position, wherein the neutralizing sheet is pressed into intimate juxtaposition with the lenticular sheet such that the pliable portion deforms to assume ~~assumes~~ the shape of the lenticular sheet, and a second position, wherein the neutralizing sheet is separated from the lenticular sheet.

REASONS FOR ALLOWANCE

2. Claims 1-7 are allowed. The following is a statement of the examiner's reasons for allowance. The present application relates to a neutralizing sheet for an autostereoscopic image viewing system. Regarding claims 1 and 3, the prior art fails to disclose a neutralizing sheet having a pliable portion deforms to assume the shape of the lenticular sheet in the first position.

Art Unit: 2873

The claimed invention is therefore considered to be in condition for allowance as being novel and non-obvious over prior art.

3. The prior art taken either singly or in combination fails to anticipate or fairly suggest the limitations of the independent claims, in such a manner that a rejection under 35 USC 102 or 103 would be improper. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Other Information/Remarks

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Eichenlaub (US Patent 5,500,765) discloses a similar image viewing system. However, Eichenlaub does not disclose a neutralizing sheet having a pliable portion that deforms to assume the shape of the lenticular sheet upon contact. Kayashima et al. (US Patent 6,133,928) discloses a flexible layer adjacent to the lenticular sheet. However, Kayashima's flexible member does not fully deform to assume the shape of the lenticular.

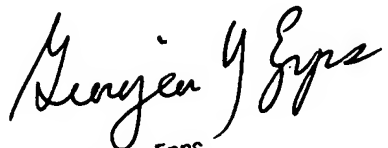

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jack Dinh whose telephone number is 571-272-2327. The examiner can normally be reached on M-F (9:30 AM - 6:00 PM).

Art Unit: 2873

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Georgia Y. Epps can be reached on 571-272-2328. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
